## Foreword

The following report contains updated tables for 2009 for the Yearbook of Education Statistics. It contains comprehensive and detailed tables and time series. The section on tables in this 2009 version is presented according to sex. In addition to data from Statistics Sweden's own surveys, education statistics produced by other agencies and organisations are also included.

The Yearbook of Education Statistics is published in two separate parts: an annual section with tables and a commentary section every third year. The most recent text section was published in December 2007 and contains descriptive and commentary text, graphs and general tables. The section on tables is printed every third year when the commentary section is published. The section on tables for 2009 is only published in Excel and PDF format on Statistics Sweden's website.

The Yearbook of Education Statistics 2009 has been produced by Lars-Olov Sundh.
