About the survey

Aim and use

Statistics on the production of commodities and industrial services describe the value and quantities of commodities and related services, which Swedish industry produced during the year.

In Sweden this statistics are mainly used by public authorities and organisations representing industries. The statistics are the main source for the manufacturing and mining industries' contributions to the Gross Domestic Product (GDP). Statistics on the production of commodities and industrial services are also included in an EU coordinated survey known as Prodcum.

Reporting period

The data refer to financial year 2019. For enterprises with a split financial year, the data should refer to the financial year ending between 2019-05-01 and 2020-04-30. Enterprises whose financial year ends between 2020-01-01 and 2020-04-30 will receive the questionnaire during the month of April 2020.

Which enterprises receive the questionnaire?

The survey includes all enterprises with industrial activities and at least 20 employees during 2019 or a net turnover of SEK 50 million during 2018. In order to fulfil the requirement on reporting statistics for specific commodities, smaller enterprises with are also included. In the industries below, the threshold is reduced so that enterprises with at least 10 employees are included:

SNI 2007 (national version of NACE)	Description
08	Other mining and quarrying
20.15	Manufacture of fertilisers and nitrogen compounds (covers manufacture of garden soil with peat as main component)
23.5	Manufacture of cement, lime and plaster
23.6	Manufacture of other articles of concrete, plaster and cement
23.7	Cutting, shaping and finishing of stone
23.9	Manufacture of abrasive products and other non-metallic mineral products

Each enterprise receives one or more forms depending on how many units in the enterprise will be surveyed. For further information on the survey, see [Quality declaration](#) (in Swedish).

Confidentiality and the obligation to provide data

All data concerning individual enterprises submitted in the survey are treated as confidential in accordance with Chapter 24, Section 8 of the Public Access to Information and Secrecy Act (2009:400).

There is a legal obligation to provide data to Statistics Sweden. The Swedish Code of Statutes (SFS 2001:99, 2001:100) states that the provision of such statistics is obligatory. Enterprises, which have not fulfilled their obligations, may thus be subject to penalty of a fine. The specific provisions of Statistics Sweden concerning production of commodities and industrial services statistics are published in Statistics Sweden's Code of Statutes, [SCB-FS 2019:27](#) (in Swedish).

Publication of results

The data is published in the statistical databases at www.scb.se partly on 30 June 2020, and partly in April 2021, when data on more detailed commodity level are published. Enterprises with sensitive data can get in touch with Statistics Sweden and request that this data will not be included in the report. Confidentiality applies only when data submitted by the enterprise may be disclosed when the data is published.

The form

Only data for 2019 should be submitted. Data for 2018 will only be corrected in the event of errors.

The instructions below correspond to the sequences in the paper form.

Section 1

Information

Changes in activities that can affect this survey are given here. This may relate to commodities or part of activities that have been sold, to whom the activity has been sold etc.

Time spent

This question is voluntary. To be able to estimate the resources used by enterprises when answering this questionnaire, there is a question about time spent.

Reporting period

The data refer to financial year 2019. For enterprises with a split financial year, the data should refer to the financial year ending between 2019-05-01 and 2020-04-30.

Section 2

2.1 Income

"Income" refers to the net turnover of the unit surveyed, which means that in addition to incomes from the industrial activity itself, incomes from other activities shall also be specified. The data should relate to sales value, which is to be calculated on the basis of ex-works price during the reporting period. Incomes are reported after deductions for cash discounts, other discounts, VAT and other taxes directly related to sales, and also after deductions for separate freight costs. Incomes under other operating incomes in the enterprise's accounts should not be reported.

For the enterprise as a whole, the data should correspond to that in its official annual report. Exceptions applicable to these provisions exist where the enterprise produces a single product over a long period, which leads to the build-up of stocks. In this case the build-up of stocks should be included in net turnover.

Row 01: Industrial activity in Sweden

"Industrial activity" refers to the total value deliveries of commodities and industrial services produced by the enterprise. This value should be specified in Table 2.1.1.

Row 02: Income from finished commodities manufactured at another unit in the enterprise

Here income is reported from the sale of commodities bought in finished state from another unit within the enterprise, and which without any further processing are sold to customers. Sales of commodities purchased from other enterprises and sold without any further processing are not included here, but reported under the relevant SNI 2007-code (national version of NACE) under "Other activities" (rows 05-15).

Row 02b: Income from commodities manufactured abroad on behalf of the enterprise, but which prior to sales are transported back to Sweden

Here income is reported for commodities invoiced from Sweden, but which are manufactured/processed on behalf of the enterprise by a subcontractor abroad and where the commodities have been transported to Sweden.

Row 03: Income from commodities which are manufactured/processed by a sub-contractor on behalf of the enterprise abroad, and which are sold abroad without passing across Swedish borders

Here income is reported for commodities invoiced from Sweden, but manufactured/processed on behalf of the enterprise by a subcontractor abroad and where the commodities are sold abroad without crossing Swedish borders. Note that costs for this activity should also be provided when income exceeds SEK 20 million.

Row 04: Merchanting goods - Income from goods for resale purchased and sold abroad (in an unchanged condition) without passing the Swedish border

Here income is reported for goods invoiced from Sweden, but which are bought and sold abroad without crossing Swedish borders (i.e. merchanting goods). Note that costs for this activity should also be provided when income exceeds SEK 20 million.

Rows 05-15: Income from Other activities

Here that part of net turnover that cannot be related to rows 01-04 is reported. "Other activities" refers to activities such as transport, agriculture and forestry, building and construction, wholesale agency and retail sales, hotel and restaurant activities, administration of property and rental activities, provision of energy and business services. Income should be allocated to activity codes, SNI 2007 (national version of NACE), in accordance with the enclosed list, see

Annex 1. In cases where it is difficult to find an appropriate code, a verbal description of the activity can be given.

Rows 17-19: Internal deliveries

Internal deliveries refer to the sales value of products/services sold to other units within the enterprise. Internal deliveries can be divided into three areas:

Row 17: Internal deliveries for further processing

Here internal deliveries of products and semi-finished products, originating from industrial activities, which are further processed by the receiving unit before the finished commodities are sold to the customer.

Row 18: Internal deliveries of finished commodities produced by the unit surveyed

Here internal deliveries of products, originating from industrial activities, which the receiving unit sells to the customer without further processing. This also applies to internal deliveries to sales offices or other units which are not investigated in this survey, but which belong to the enterprise.

Row 19: Internal deliveries of goods and services from non-industrial activity

Here internal deliveries of products not originating from industrial activity are reported. Reporting specifies the value which originates from other activities (rows 05-15).

Row 20: Total net turnover excluding internal deliveries

Here the net turnover of the unit surveyed is reported with internal deliveries deducted, i.e. the figure which corresponds to net turnover in the enterprise's annual report.

2.1.1 Distribution of industrial activity

Row 21: Deliveries of commodities produced by the enterprise for external parties or other units within the enterprise

All sales of products manufactured in the unit. Also includes specially commissioned production, i.e. subcontracting work. Industrial activities also cover by-products such as waste, scrap, steam etc.

Row 22: Processing under contract for external parties or other units within the enterprise

All processing under contract carried out on behalf of external parties or other units within the enterprise. Processing under contract refers to production where the purchaser is responsible for the major part of the materials used in production.

Row 23: Repairs and maintenance for external parties or other units within the enterprise

All repairs and all service/maintenance carried out for external parties or other units within the enterprise are reported here. Exceptions are enterprises which are in the following industries:

SNI 2007-codes 41-43: New construction and repairs, refurbishment, renovation and maintenance work

SNI 2007-code 45.2: Maintenance and repair of motor vehicles apart from motorcycles

SNI 2007-code 95: Repair of computers, personal and household goods

The exceptions are reported with the related SNI 2007-codes under "Other activities" (rows 05-15).

Row 24: Assembly and installation for external parties or other units within the enterprise

This covers all assembly/installation for external parties or other units within the enterprise, which are carried out at the customer.

Row 25: Other processing for external parties or other units within the enterprise

This refers to processing of products bought or received which are of such a type that they are not included under the terms production, processing under contract, repairs or assembly. Some examples are bleaching, dyeing, grinding, printing, gilding, etching and coating.

In addition, some commodity codes are included where the EU does not have the linkage between the commodities nomenclature used for production statistics, Prodcom, and the Combined Nomenclature (CN) that Sweden uses in the survey. This applies, for instance, to the production of vessels with CN codes within 8901-8902 and 8904-8908. These products are reported under special commodity codes, see the document "List of codes" at <http://www.scb.se/ivp-en> and "Sök varunummer" or "Sök varunummer per bransch" (in Swedish) at <http://www.scb.se/ivp>. Contact Statistics Sweden if you need help in finding the right commodity code.

Section 3

The data in table 2.1.1 should correspond to the specifications of commodities and services in sections 3.1 and 3.2. Row 21, row 23, row 24 and row 25 should be specified in 3.1 and row 22 should be specified in 3.2.

3.1 Specification, value of production of commodities and industrial services

Column: Commodity code, Description, Quantity unit

The commodity code to be used is classified in accordance with CN. For industrial services, specific codes are used for the production statistics. Pre-printed commodity codes only exist for data previously submitted. If changes have taken place in production, new commodity codes must be added.

The list of codes 2019 is specified at the IVP page for respondents <http://www.scb.se/ivp-en>.

Help is also available (in Swedish) at <http://www.scb.se/ivp>, for the commodity codes representing your industry ("Sök varunummer per bransch").

Enter the Commodity code, quantity and value. If you do not find an appropriate commodity code, you can provide a written description.

Column: Quantity

The list of codes 2019 with associated quantity units is specified at the IVP page for respondents <http://www.scb.se/ivp-en>.

Help is also available (in Swedish) at <http://www.scb.se/ivp>, to find the commodity codes with associated quantity unit ("Sök varunummer"). A list of all quantity units used is provided in Annex 2.

If it is difficult to provide specific quantity data, an estimate for the quantity of commodities can be used.

Column: Value

Sales value is reported in SEK thousands. Deductible VAT, other taxes and fees as well as public subsidies and contributions should not be included. **Note that value refers to sales value.**

Column: Internal deliveries

The value for internal deliveries (applies only to enterprises where a number of units are surveyed) is divided up into internal deliveries for further processing, and internal deliveries of finished goods produced by the unit being surveyed.

For repairs and maintenance, value should correspond to income for such processing and also include the materials used. For assembly and installation, only the value of the service provided should be reported.

3.2 Specification, processing under contract by commodity code

Column: Commodity code, Description, Quantity unit

Commodity code is classified in accordance with the Combined Nomenclature (CN). For industrial services, specific codes are used for the production statistics.

The list of codes 2019 is specified at the IVP page for respondents <http://www.scb.se/ivp-en>.

Help is also available (in Swedish) at <http://www.scb.se/ivp> for the commodity code representing the unit's main industry ("Sök varunummer per bransch"). Enter the Commodity code, quantity and value.

If you cannot find an appropriate commodity code, you can describe the commodities clearly under the heading "Description" or contact Statistics Sweden for help.

Column: Quantity

The list of codes 2019 with associated quantity units is specified at the IVP page for respondents <http://www.scb.se/ivp-en>.

Help is also available (in Swedish) at <http://www.scb.se/ivp>, to find the commodity codes with associated quantity unit ("Sök varunummer"). A list of all quantity units used is provided in Annex 2.

Column: Value

Sales value is reported in SEK thousands. **Note that value refers to sales value.**

Column: Internal deliveries

The value for internal deliveries (applies only to enterprises where a number of units are surveyed) is divided up into internal deliveries for further processing, and internal deliveries of finished goods produced by the unit being surveyed.
