### ILO Bulletin of Labour Statistics

The **Bulletin of Labour Statistics** is published quarterly, with Supplements in the intervening months. It presents monthly and quarterly series on employment, unemployment, hours of work, wages and consumer prices from national official statistics.

A separate edition of the **Bulletin** is published towards the end of each year with the results of the *ILO October Inquiry*, an annual survey of wages and hours of work in 159 occupations and of retail prices for 93 food items.

The regular quarterly issues of the **Bulletin** usually include one or more articles of methodological interest in the area of labour statistics.

Statistical Journal of the United Nations Economic  
Commission for Europe

The Statistical Journal is a quarterly published by IOS for the United Nations Economic Commission for Europe (UN/ECE). A Principal Subsidiary Body of the UN/ECE, the Conference of European Statisticians, has been working for almost 30 years on the full range of problems of concern to national statistical services. International meetings organized by the Conference provide opportunities for indepth discussions of organizational models or methodological solutions. The aim of the Journal is threefold: to inform the professional world of statisticians of the Conference; to establish a forum for critical discussion of the entire range of organizational, methodological, analytical or conceptual problems facing statistical services; and, to facilitate the maintenance of high quality in the future work of the Conference of European Statisticians.

The Journal publishes articles related to the work programme of the Conference, covering five major areas: regional statistical cooperation; organization and operation of statistical services; development and harmonization of economic statistics; development and harmonization of social and demographic statistics; and, development and harmonization of environment and related statistics. Each issue of the Journal usually contains a mix of articles from these areas. However, on occasion, an entire issue may deal with one area of statistics only.

Futhermore, the Journal now includes news from national and international statistical offices.

The following articles are included in the last four issues of the Journal:

**Volume 11, Number 3, 1994** ISSN 0167-8000

**W. CHANDLER**

The value of household work in Canada, 1992

**A. VANOLI**

Extension of national accounts: opportunities provided by the implementation of the 1993 SNA

**J. LUDLEY**

Migration to open system and relational databases: recent experience and lessons learned

**A. HUNDEPOOL**

STATview: new ways for the dissemination of statistical data

**A. MONTY, H. FINLAY**

Strengths and weaknesses of administrative data sources: experience of the Canadian Business Register

**K. JANSSON**

Use of administrative registers for income statistics in Sweden

**Volume 11, Number 4, 1994** ISSN 0167-8000
