

## In Other Journals

### STATISTICAL JOURNAL OF THE UNITED NATIONS ECONOMIC COMMISSION FOR EUROPE (SJU)

The Statistical Journal of the United Nations Economic Commission for Europe (SJU) is published in volumes of four issues. It covers five major areas of statistical work:

1. Regional and international statistical co-operation,
2. Organization and operation of statistical services, including problems of electronic data processing,
3. Methodological development and harmonization of economic statistics,
4. Methodological development and harmonization of social and demographic statistics,
5. Development and harmonization of environment and related statistics.

Reports on novel methodological approaches, analytical papers with a clear statistical content, and conceptual proposals for the solution of existing difficulties are typical subjects of contributions in each of the major work areas.

Prospective contributions should be sent to the Editor-in-charge, at the following address:

Andreas Maurer, Statistical Division, Economic Commission for Europe, Palais des Nations, CH-1211 Geneva 10, Switzerland

Subscription Information: IOS Van Diemenstraat 94, 1013 CN Amsterdam, Netherlands

Forthcoming Meetings Convened by the Conference of European Statisticians

## ILO BULLETIN OF LABOUR STATISTICS

The Bulletin of Labour Statistics is published quarterly, with Supplements in the intervening months. It presents monthly and quarterly series on employment, unemployment, hours of work, wages and consumer prices from national official statistics.

A separate edition of the Bulletin is published towards the end of each year with the results of the ILO October Inquiry, an annual survey of wages and hours of work in 159 occupations and of retail prices for 93 food items.

The regular quarterly issues of the Bulletin usually include one or more articles of methodological interest in the area of labour statistics.

---

Recent articles published in the Bulletin of Labour Statistics are:	1991-4
1991-1	ILO-comparable employment and unemployment statistics: updated results and methodology (I. Chernyshev and S. Lawrence)
Collecting traditional labour force data through modern techniques – The case of the Swiss Labour Force Survey (B. Buhmann and R. Hussmanns)	1992-1
1991-2	Measuring the demand for labour (E. Hoffmann)
La mesure du niveau d'instruction de la population active dans les Enquêtes auprès de la main-d'oeuvre (M. Imbert)	1992-2 (to be published shortly)
1991-3	Wage-fixing policies: consequences on wage data gathering (F. Eyraud)
i) The unemployed in administrative statistics and in the labour force survey in Finland (A. Laihonon)	The majority of articles are written in English with a short summary in French and Spanish.
ii) Registered unemployed and labour force survey unemployed: Comments and Danish experiences (V. L. Nielsen)	Editor: Ms. Hazel Bennett, Bureau of Statistics, ILO, 4 route des Morillons, CH-1211 Geneva 22, Switzerland.
