### ILO BULLETIN OF LABOUR STATISTICS

The **Bulletin of Labour Statistics** is published quarterly, with Supplements in the intervening months. It presents monthly and quarterly series on employment, unemployment, hours of work, wages and consumer prices from national official statistics.

A separate edition of the **Bulletin** is published towards the end of each year with the results of the *ILO October Inquiry*, an annual survey of wages and hours of work in 159 occupations and of retail prices for 93 food items.

The regular quarterly issues of the **Bulletin** usually include one or more articles of methodological interest in the area of labour statistics.
