THE STATISTICAL JOURNAL OF THE UNECE

The Statistical Journal of the United Nations Economic Commission for Europe (UNECE) aims at informing readers about work in the field of official statistics and at serving as a forum for critical discussion of the entire range of problems faced by statistical services - organizational, methodological, analytical and conceptual.

The Journal covers a wide range of statistical areas of international concern such as statistical co-operation in Europe and North America, organization and operation of statistical services, methodological and conceptual development and harmonization of statistics. Each issue of the Journal usually contains a mix of articles from these areas. However, on occasion, an entire issue may be devoted to one area of statistics only.

Abstracts as well as further information about the Statistical Journal of the UN Economic Commission for Europe can be found at www.iospress.nl.

Contents Volume 18, Number 1, 2001

The GDI as a measurement instrument on gender aspects of development in the ECE region
Ko Oudhof

Women in political and social decision-making in the Netherlands
Saskia Keuzenkamp

Constructing a regional gender equality index: reflections on a first experience with Norwegian data
Randi Kjeldstad and Jan Erik Kristiansen

Statistics on working time arrangements. An overview of issues and some experiences
Eivind Hoffmann and Adriana Mata Greenwood

International price levels and global inflation
Michael Ward

Price structures, the quality factor, and chaining
Alan Heston, Robert Summers, Bettina Aten

The effect of pregnancy in cohabiting unions on marriage in Canada, the Netherlands and Latvia
Melinda Mills, Frank Trovato

Quality adjusted price index for industrial robots
Jan Karlsson

Contents Volume 18, Number 2-3, 2001
Special Issue: Measurement of Human Development of the UNECE

Introduction

Carlo Malaguerra

Searching the truth: the need to monitor human rights with relevant and reliable means

Thomas Hammarberg

Development and human rights: the growing demand for statistics from the international community

Emad Omar

Toward a measure of dignity: indicators for rights-based development

Craig G. Mokhiber

Making the case: the role of statistics in human rights reporting

Patrick Ball

Measuring fundamental rights at work

David Kucera

Current progress in implementing new methods and conducting innovative surveys for measuring exploitation of children

Kebebew Ashagrie

Defining and observing minorities: an objective assessment

Gustave Goldmann

Gaining co-operation from a multi-cultural society of respondents: a review of the US Census Bureau's efforts to count the newly immigrated population

Marvin D. Raines

Contribution of statistical analysis to the investigations of international criminal tribunals

Helge Brunborg

Indicators of human development and human rights: overlaps, differences . . . and what about the human development index?

Sakiko Fukuda-Parr

The investigation and documentation of events as a methodology in monitoring human rights violations

Manuel Mario Guzman

Human rights and statistics – some reflections on the no-man’s land between concept and indicator

Nancy Thede

Monitoring Development and Human Rights? A project for handling the challenge

Carol Mottet, Raul Suarez de Miguel

Contents Volume 18, Number 4, 2001
Special Issue: Data Confidentiality

Introduction

Tiina Luige

Statistical microdata – confidentiality protection vs freedom of information

Bo Sundgren

A holistic approach to confidentiality assurance in statistical data

Gerald W. Gates

Perceptions of confidentiality protection at statistical agencies: some evidence from data on businesses and households

Nick Greenia, Julia Lane, Diane Willimack

Computational Aspects of Statistical Confidentiality – the CASC-project

Anco Hundepool

Statistical disclosure control in practice: some examples from Statistics Netherlands

Eric Schulte Nordholt

Disclosure control for demographic statistics: redefined guidelines and development of methods at Statistics Finland

Marja Tammilehto-Luode

Experiences on model based disclosure limitation

Luisa Franconi, Alessandra Capobianchi, Silvia Polettini, Giovanni Seri

On the complexity of optimal microaggregation for statistical disclosure control

Anna Oganian, Josep Domingo-Ferrer

Combining complete and partial cell suppression methodologies in statistical disclosure control

Matteo Fischetti, Juan José Salazar González

Bounds for cell entries in contingency tables induced by fixed marginal totals with applications to disclosure limitation

Adrian Dobra, Stephen E. Fienberg

Re-identifying register data by survey data: an empirical study

Stefan Bender, Ruth Brand, Johann Bacher

Advances in data intrusion simulation: a vision for the future of data release

Mark Elliot

Overview of statistical data confidentiality protection in transition countries

Tiina Luige

Contents Volume 19, Number 1, 2002

Special Issue: Environment Statistics

Introduction

Lene Mikkelsen, Rosemary Montgomery

The European Environment Agency focuses on EU-policy in its approach to sustainable development indicators

Peter Bosch

The development of national, regional and local indicators of sustainable development in the United Kingdom

John Custance

Efficiency: the sustainability criterion that provides useful guidance for statistical research

Rosemary Montgomery, Luisa Sanches

Eco-efficiency indicators in German environmental accounting

Hartmut Höh, Karl Schoer, Steffen Seibel

Indirect methods used for waste statistics and waste indicators

Ruth H. Sheshinski

Industrial and consumption waste. How to meet the indicator needs. Experiences from Finland

Simo Vahvelainen

Information for decision-making in health and environment
Lene Mikkelsen

Environmental health indicators: development of a methodology for the WHO European region
Dafina Dalbokova, M. Kryzanowski

Developing environmental public health indicators in Canada
Paul Samson
