

## Special Note

### 7th Conference on the Scientific Use of Statistical Software (SoftStat '93)

Time: March 14–18, 1993  
Location: University of Heidelberg  
Organization: Center for Surveys, Methods and Analyses (ZUMA) in cooperation  
with the Institute for Medical Biometrics and Informatics of the  
University of Heidelberg

#### Topics of Special Interest:

1. Statistical Programs in Data Analysis
2. Knowledge-Based Systems in Statistics
3. Simulation
4. Experimental Design
5. Interactive Graphical Data Analysis
6. Processing of Very Large Data Bases
7. Cartography and Geographic Information Systems
8. Statistics in Linguistic Data Processing
9. Computer-Assisted Data Collection
10. Scaling and Classification
11. Data Models and Design of Data Bases
12. Statistical Workstations and Computer Networks
13. Distributed Processing, Parallel Processing
14. Training in Statistics and Statistical Software
15. Statistical Algorithms
16. Further Applications of Statistical Software e.g.,
  - Use of External Information Systems
  - Problems of Statistical Counselling
  - Symbolic Computation
  - Connectionistic Applications

Deadline for Abstracts: August 1, 1992

Further Information: SoftStat '93
