

Future plans for PxWeb 2

PX-MEETING IN PRISTINA, OCTOBER 2026

Statistisk sentralbyrå
Statistics Norway **150 år**

Agenda

2026

2027 (highlights)

Future (highlights)

A note on priorities

- The priorities reflect our *current* focus areas
- They may change over time based on:
 - user insights and feedback
 - technical constraints
 - strategic goals
 - development capacity
 - contributions from collaborators

Our priorities for the rest of 2026

Chart

- Bar chart
- Improve spacing, visual details, tooltip
- Keyboard navigation
- Presentation of image file
- Etc.

Make possible to sort topic filter by sortCode

- If there is a sort code in the indata program or in a text file (as in PxWeb 1) the menu sorts by it
- If there is no sort code, the menu sorts alphabetical
- Documentation

Support for global alerts

- Enable editors to publish and manage alerts that can be displayed across the entire application, independently of software releases

Our priorities for 2027 (highlights)

Highlights starting page

- Improve table search
- Filter for regional level
- Expand the time period filter with additional period options, and remove the option “Other”
- Consistent table sorting within topics
- Allow users to choose how the table list is sorted

Highlights starting page

- Evaluate a compact table list view alongside the existing card view (to support different user needs and browsing preferences)
- Improve table card layout

Highlights table page

- Additional chart types: Horizontal bar chart, population pyramid
- Investigate and improve performance issues
- Select ranges of values using Shift+click in the variable box
- Add more download formats and advanced configuration options
- Hide empty rows
- Display as code, text or both

Highlights table page

- Enhance the variable selection experience
- Add predefined table layouts to simplify data extraction
- Enhance the handling of notes
- Enable one-click download of complete tables (“bulk download”)

Highlights table page

- Table component:
 - Sticky header
 - Fixed first column
 - Improve horizontal scrolling
 - Column hover
 - Improve loading (better feedback)

Future (highlights)

Future

- Support linking to replaced (closed), related, and/or external tables
- Sum variable values
- Improve handling of tables with multiple topic placements
- Show notes in context (in the table)
- Hierarchies
- Map

Thank you!
